Leave the cabbage to soak for 24 hours in 3tbsps of rats blood

Preheat the oven to 250 degrees

Method

1. First slowly mix the brown poo with the pink and purple slime and the hard clay until it is combined into a dough.
2. Next knead together the smelly dough and make it into a ball.
3. Then evenly roll the dough to 2cm thick and a circle shape to make your pizza base. When it is done put it on the baking tray.
4. After that put the rats blood into a bowl and add the grated soap and mix well to make the pizza sauce.
5. Next spread the sauce onto the disgusting pizza and sprinkle on the dogs claws.
6. Then place the wriggly worms evenly on top of the pizza, be careful they don't wriggle away.
7. Next slowly scatter the crunchy toadstools on top of the worms, followed by a sprinkling of the soggy cabbage.
8. Finally sprinkle the fur on the pizza before baking in the oven at 250 degrees.
